## About 3EDGE

3EDGE Asset Management, LP, is a multi-asset investment management firm serving institutional investors, the advisor marketplace and private clients. 3EDGE strategies act as tactical diversifiers, seeking to generate consistent, long-term investment returns, regardless of market conditions, while seeking to manage downside risks.

The primary investment vehicles utilized in portfolio construction are exchange traded vehicles. The investment research process is driven by the firm's proprietary global capital markets model. The model is tested over a wide variety of economic and market conditions and translates decades of research and investment experience into a system of causal rules and algorithms to describe global capital market behavior. 3EDGE offers a full suite of solutions that seek to meet investors' different objectives. Of course, investing involves risks and the potential loss of your investment.

**Bob Phillips** - Managing Partner, Chief Technology Officer

**Eric Biegeleisen, CFA®** - Deputy Chief Investment Officer

**Monica Chandra** - President, Head of Business Development

**Lawrence Jules** - Senior Vice President, Head Trader

The 3EDGE Faith-Focused Conservative Strategy ("the FF Conservative Strategy") is a globally diversified, multi-asset portfolio, invested across a wide variety of asset classes and geographies that includes an emphasis on biblically responsible investing (BRI). Investment exposure is achieved primarily through the use of index exchange traded funds (ETFs) that are selected based upon BRI filtering that includes a focus on advocacy for Christian values. The portfolio seeks to focus more on preservation of capital and management of volatility. It may be appropriate for investors who are more risk averse, who may rely on the portfolio for current income or who are investing with a relatively shorter time frame (1-3 years), at least for this component of their overall liquid assets.

The FF Conservative Strategy doesn't necessarily focus on a particular target range for generating current income through dividends and interest, but rather takes a total return approach. Along with interest and dividends, the FF Conservative Strategy will also rely on potential capital appreciation as a component of total portfolio returns.

## Target Asset Class Ranges\*

Equities	Hard Assets	Short-Term Fixed Income and Cash	Intermediate-Term Fixed Income
6% – 30%	4% – 22%	10% – 88%	2% – 80%

Hard Assets (Gold & Commodities) includes precious metals such as gold as well as investments that operate and derive much of their revenue in Hard Assets, e.g., MLPs, metals and mining corporations, etc. Intermediate-Term Fixed Income includes fixed income funds with an average duration of greater than 2 years and less than 10 years. Short-Term Fixed Income and Cash includes cash, cash equivalents, money market funds, and fixed income funds with an average duration of 2 years or less.

See disclosures for more information.

## Performance

as of 6/30/25

Net of fee performance was calculated using highest annual management fee of 80bps.

### Annualized Performance<sup>†</sup> (Net)

	1 Year	3 Year	Since Inception
Composite	6.69%	4.10%	2.59%
Benchmark <sup>‡</sup>	9.50%	7.44%	2.15%

### Calendar Year Performance (Net)

	2022	2023	2024	YTD	Q2 2025
Composite	-3.90%	4.35%	4.57%	4.31%	1.79%
Benchmark <sup>‡</sup>	-13.99%	10.94%	6.59%	5.93%	4.49%

## Risk Statistics (Since Inception)

as of 6/30/25

	Standard Deviation <sup>1</sup>	Sharpe Ratio <sup>2</sup>	Maximum Drawdown <sup>3</sup>	Beta vs S&P 500 <sup>4</sup>
Composite	3.71%	-0.39	-4.93%	0.15
Benchmark <sup>‡</sup>	9.17%	-0.17	-17.51%	0.48

<sup>‡</sup> Benchmark is S&P Target Risk Conservative Total Return Index. See additional disclosures.

<sup>†</sup> 1 Year and Since Inception are an annualized returns based on a period of 12 months using monthly returns. The Total Return Strategy composite creation date is 1/1/2022.

<sup>1</sup> Standard Deviation measures the degree of variation of investment returns around the mean (or average) return and is calculated as the square root of the variance

<sup>2</sup> Sharpe Ratio is typically calculated as annualized excess returns divided by annualized volatility. It is a measure of investment return per unit of volatility experienced by the investment within a given investment horizon

<sup>3</sup> Maximum Drawdown is a measure of risk that captures the worst cumulative peak-to-trough decline of an investment or portfolio from any month-end data point to any other month-end data point. It shows in percentage terms how much money an investment portfolio would have lost before returning to its breakeven point.

<sup>4</sup> Beta is a measure of the volatility of the portfolio in comparison to the market as a whole. Calculated as realized values vs. S&P 500 TR.

**DISCLOSURES:**

This Fact Sheet is provided to current and prospective clients of the 3EDGE Faith-Focused Conservative Strategy for informational purposes only. It does not constitute an offer to buy or sell any security. The information provided in this Fact Sheet is not intended to provide personal investment advice and does not consider the investment objectives and financial resources of the recipient. Performance for the Faith-Focused Conservative Strategy is shown net of the highest possible management fees and all other expenses and includes the reinvestment of dividends and other earnings. Net of fee performance was calculated using highest annual management fee of 80bps.

The Faith-Focused Conservative Strategy may from time to time be outside of the percentage ranges listed when it is deemed appropriate by 3EDGE Asset Management. It is important to understand that although 3EDGE Asset Management seeks to manage risk in the Faith-Focused Conservative Strategy, there is still a material amount of market risk (and equity risk in particular) embedded in the Faith-Focused Conservative Strategy at all times and declines in the portfolio from time to time are inevitable. Even though we seek to manage risk and volatility, the portfolio certainly has the potential to decline in value. Investments in securities, including common stock, fixed income, commodities, ETNs and ETFs involve the risk of loss that investors should be prepared to bear. Performance and AUM numbers are unaudited. Past performance is not indicative of future results.

3EDGE Asset Management's investment objective is to seek to earn attractive risk-adjusted returns over full market cycles. We do not actively seek to outperform any specific benchmark index on a relative basis. Nonetheless, we utilize the S&P Target Risk Conservative Total Return Index ("the Benchmark") for the Faith-Focused Conservative (FFCN) Strategy. The Strategy is not an index fund and its portfolio holdings, country exposure, portfolio characteristics and performance will differ from that of the Benchmark. The Benchmark is simply a baseline against which we monitor the FFCN Strategy. It is intended to represent a passive, global, multi-asset class portfolio with similar risk characteristics to the FFCN Strategy. The Benchmark has not been selected as a specific benchmark to compare to the performance of the FFCN Strategy, but has been provided to allow for comparison of the performance of the FFCN Strategy to that of well-known and widely recognized indices. The Indices used in the Benchmark are represented by total return prices. Indexes are unmanaged and therefore do not include fees and expenses typically associated with investments in managed accounts. One cannot invest directly in an index.
