About 3EDGE

3EDGE Asset Management is a multi-asset investment management firm serving institutional investors, the advisor marketplace and private clients. 3EDGE strategies act as tactical diversifiers, seeking to generate consistent, long-term investment returns, regardless of market conditions, while seeking to manage downside risks.

The primary investment vehicles utilized in portfolio construction are exchange traded vehicles. The investment research process is driven by the firm's proprietary global capital markets model. The model is tested over a wide variety of economic and market conditions and translates decades of research and investment experience into a system of causal rules and algorithms to describe global capital market behavior. 3EDGE offers a full suite of solutions that seek to meet investors' different objectives. Of course, investing involves risks and the potential loss of your investment.

The 3EDGE ESG Aggressive Strategy ("the Strategy") seeks to generate attractive risk-adjusted returns through a globally diversified portfolio of ESG-focused Exchange Traded Funds (ETFs). It is designed for investors who are interested not only in seeking to generate returns, but also represent their personal values to have a positive, long-term impact on Environmental issues like climate change, Social issues like labor practices and product safety and the Governance issues including board diversity and ethics - hence the term ESG. ETFs in the Strategy are selected based upon their ESG scores and rankings established by third-party providers such as MSCI. In addition, the Strategy focuses on ETFs that own securities of companies that maintain the lowest carbon footprint as measured by the weighted tons of carbon dioxide emissions per million dollars of sales. An appropriate time horizon for the ESG Aggressive Strategy would be more than 10 years, at least for this component of an investor's overall liquid assets.

Current Composition

as of 12/31/25

Target Asset Class Ranges

Equities	20% - 80%
Hard Assets	4% - 35%
Intermediate-Term Fixed Income	10% - 81%
Short-Term Fixed Income and Cash	2% - 73%

Hard Assets (Gold & Commodities) includes precious metals such as gold as well as investments that operate and derive much of their revenue in Hard Assets, e.g., MLPs, metals and mining corporations, etc. Intermediate-Term Fixed Income includes fixed income funds with an average duration of greater than 2 years and less than 10 years. Short-Term Fixed Income and Cash includes cash, cash equivalents, money market funds, and fixed income funds with an average duration of 2 years or less. Although there are no fixed limitations on the exposure to any particular asset class in the ESG Aggressive Strategy, under normal market conditions the ESG Aggressive Strategy will tend to hold securities in the percentage ranges listed to the right for each of the four mentioned asset classes.

Performance

as of 12/31/25

Annualized Performance[‡] (Net)

	1 Year	3 Year	Since Inception
Composite	20.47%	12.36%	5.92%
Benchmark [§]	16.59%	14.21%	6.86%

ESG Aggressive Strategy Composite: The investment objective of the 3EDGE ESG Aggressive Strategy is to generate long-term capital appreciation and attractive risk-adjusted returns over full market cycles with an environmental, social, and corporate governance (ESG) focus. It is rebalanced on a model-driven basis. The ESG Aggressive Strategy may be appropriate for investors who are more focused on longer-term capital appreciation and have a time horizon of more than 10 years, at least for this component of an investor's overall liquid assets. There are no fixed limitations on the exposure to any particular asset class in this Strategy and no fixed limitations on holdings in any particular country. However, under normal conditions the Strategy will hold a higher percentage of U.S. securities than non-U.S. securities (up to 100% of the Strategy). Composite creation date is 4/1/2021.

The benchmark is the S&P Target Risk Growth Total Return Index. As of January 2023, 3EDGE switched the benchmark from 45% Financial Times Stock Exchange World Government Bond Index WGBI/ 45% Morgan Stanley Capital International All Country World Index MSCI ACWI TR/ 10% Bloomberg Commodity Total Return Index BCOMTR to the S&P Target Risk Growth Total Return Index. 3EDGE elected to make the change as the newly selected benchmark is widely recognizable and exhibits a similar risk characteristic to the strategy. 3EDGE Asset Management's investment objective is to seek to earn attractive risk-adjusted returns over full market cycles. We do not actively seek to outperform any specific benchmark index on a relative basis. Nonetheless, we have established the ESG Benchmark ("the Benchmark") for the ESG Aggressive Strategy. The ESG Aggressive Strategy is not an index fund and its portfolio holdings, country exposure, portfolio characteristics and performance will differ from that of the Benchmark. The Benchmark is simply a baseline against which we monitor the ESG Aggressive Strategy. The Benchmark is represented by total return prices. Indexes are unmanaged and therefore do not include fees and expenses typically associated with investments in managed accounts. One cannot invest directly in an index. Benchmark Data Source: Bloomberg.

3EDGE Asset Management, LP is an investment management firm focusing on a global, multi-asset investment strategy that seeks to blend scientific methodology with sound judgment and practical experience. Headquartered in Naples, FL, the firm provides investment management services to both private clients and institutional investors.

3EDGE claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. 3EDGE has been independently verified for the periods 1/1/2016 through 12/31/2024. The verification reports are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

The firm's list of composite descriptions is available upon request.

The U.S. Dollar is the currency used to express performance. Returns are presented gross and net of management fees and include the reinvestment of all income. Net of fee performance was calculated using highest annual management fee of 0.80%, and is net of administrative fees as applicable. The annual composite dispersion presented is an asset-weighted standard deviation calculated for the accounts in the composite the entire year. 3EDGE calculates the external standard deviation using net of fees monthly composite returns. 3EDGE calculates the composite dispersion using gross returns. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. Composite performance is presented gross of foreign withholding taxes on dividends, interest income and capital gains. Past performance is not indicative of future results.

The investment management fee schedule for the composite is 0.80% on the first \$1 million, 0.70% on the next \$4 million, 0.60% on the next \$45 million and 0.50% on the amount over \$50 million. Actual investment advisory fees incurred by clients may vary.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

BENCHMARK: ⁵S&P Target Risk Total Return Index: the S&P Target Risk Index Series is composed of ETFs representing stock-bond allocations across a risk spectrum. The S&P Target Risk Growth Index (Bloomberg Ticker: SPTGGUT) is designed to measure the performance of equity allocations, while seeking to provide limited fixed income exposure to diversify risk.

RISK MEASURES:

1. Standard Deviation measures the degree of variation of investment returns around the mean (or average) return and is calculated as the square root of the variance.
2. Sharpe Ratio is typically calculated as annualized excess returns divided by annualized volatility. It is a measure of investment return per unit of volatility experienced by the investment within a given investment horizon.
3. Maximum Drawdown is a measure of risk that captures the worst cumulative peak-to-trough decline of an investment or portfolio from any month- end data point to any other month- end data point. It shows in percentage terms how much money an investment portfolio would have lost before returning to its breakeven point.
4. Beta is a measure of the volatility of the portfolio in comparison to the market as a whole. Calculated as realized values vs. S&P 500 TR.

DISCLOSURES: This Fact Sheet is provided to current and prospective clients of the 3EDGE ESG Aggressive Strategy for informational purposes only. It does not constitute an offer to buy or sell any security. The information provided in this Fact Sheet is not intended to provide personal investment advice and does not consider the investment objectives and financial resources of the recipient. Performance for the ESG Aggressive Strategy is shown net of the highest annual management fee of 0.80% and all other expenses and includes the reinvestment of dividends and other earnings. The ESG Aggressive Strategy may from time to time be outside of the percentage ranges listed when it is deemed appropriate by 3EDGE Asset Management. It is important to understand that although 3EDGE Asset Management seeks to manage risk in the ESG Aggressive Strategy, there is still a material amount of market risk (and equity risk in particular) embedded in the ESG Aggressive Strategy at all times and declines in the portfolio from time to time are inevitable. Even though we seek to manage risk and volatility, the portfolio certainly has the potential to decline in value. Investments in securities, including common stock, fixed income, commodities, ETNs and ETFs involve the risk of loss that investors should be prepared to bear. Performance and AUM numbers are unaudited. Past performance is not indicative of future results. For Financial Professional Use Only.
